EDUCATION

B. Tech (E.C.E)

AI&T, GGSIPU
CGPA **7.79/10**

Class XII

SNEH International
School: **82.8%**

Class X

Preet Public
School: **9.2/10**

CERTIFICATIONS

- **Certified Ethical Hacker (CEH v.11)**
- **Azure-900**
- **EC certified Incident Handler ver. 2**
- **Zscaler Data Protection (EDU-220)**
- **Zscaler Cyberthreat Protection (EDU-230)**

OBJECTIVE

Proactive Incident Response and Security Administrator adept at predicting and disrupting intrusion attempts. Pioneer novel network security measures to combat emerging threats. Maintains proven track records of utilizing both education and technological solutions to fortify companies against malicious and data breaches.

WORK EXPERIENCE

NETWORK SECURITY ANALYST

Wipro, Pune – 08/2019 – 11/2021

Worked on an airport-based project, providing security support to protect infrastructure and ensure service availability. As part of the Incident Response Team, I monitored SIEM alerts, investigated threats, analyzed phishing emails, and created security rules based on user behavior. I also assessed ongoing attacks, vulnerabilities, and their impact on our infrastructure. As a Network Security Administrator, I ensured seamless communication across firewalls, load balancers, and other devices while managing endpoint protection, proxy policies, and SSL certificates.

CDIR- Associate Consultant

KPMG, Bengaluru – 11/2021 – 06/2022

Worked as a Digital Forensic and Incident Response Analyst, investigating malware attacks, identifying root causes, and analyzing malware behavior to minimize incident impact for clients associated with KPMG. I also conducted web application security testing and performed threat hunting to identify infrastructure vulnerabilities. Additionally, I assessed security posture and ensured compliance across various domains.

GSRC-Security Engineer(L2)

Encora, Bengaluru – 06/2022 – Present

Security-focused professional with a background in Business and Operations Analysis, experienced in assessing technology risks, strengthening governance processes, and supporting secure cloud integrations across hybrid environments. Worked with infrastructure and platform teams to identify security gaps such as excessive access permissions, exposure risks, and logging deficiencies, translating findings into structured remediation actions. Contributed to the operationalization of CNAPP findings by validating and prioritizing issues based on exposure and business impact to focus on high-risk areas. Supported identity and access governance reviews, privilege assessments, and audit evidence reporting to reduce access creep and improve control maturity. Assisted in enhancing monitoring and detection capabilities through SIEM use cases and KQL queries, improving visibility into authentication events and configuration changes, and supported incident investigations through impact and root cause analysis.

SKILLS

- Incident response & Handling
- Threat hunting and risk assessment
- EDR/XDR (Palo Alto XDR, MS Defender, TM Vision One, Carbon Black Cloud)
- Zscaler Data Protection and DLP
- Parser and Detection Rule creation
- SIEM Onboarding, Report creation and query building
- Cloud Security (Roles, Policy and attack surface management)
- CNAPP and CSPM (Defender for cloud, PimSAFE and Fortinet Lacework)

DECLARATION

I hereby declare that the above-mentioned details are best of my knowledge.
